Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 17-20 , drawn to , drawn to a video decoder system for receiving program guide information from a first source and a second source, converting a first code to a second code, and a third code to a fourth code in accordance with equivalence mapping information for allocating a category in a master set of program categories, sorting and merging the program guide prior to display (figure 5), classified in class 725, subclass 48.
- II. Claims 21-40 and 42-43, drawn to drawn to a video decoder system for receiving program guide information, forming a composting program map by mapping program guide information from a plurality of sources into a master set of themes and topics based on pre-determined theme and topic codes, incorporating the composite program map into linking data, merging program guide information into a composite program guide defined by the master set of themes and topics and utilizes linking data that associates access data with data identifiers and user selectable menu options (Figure 6), classified in class 725, subclass 45.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in

Art Unit: 2623

scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as sorting by topics within a theme and providing to a user a number of user selectable menu options which utilize linking data. See MPEP § 806.05(d). While there may be overlap in the search areas involved in inventions I and II, there is a distinction between each invention. In the event that Applicant disagrees, the Examiner invites Applicant to clarify why the inventions are not distinct.

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hunter B. Lonsberry whose telephone number is 571-272-7298. The examiner can normally be reached on Monday-Friday during normal business hours.
